

REMARKS

Claims 1-23 are in the application.

Claims 1-9 and 11-18 are amended and claims 19-23 are new.

Language inferring particular time sequence has been eliminated, and the claims are simplified. The minimum number of data types is now one. A source, from which data is requested is now defined.

Claims 1-18 are rejected under 35 U.S.C. § 103(a) as being unpatentable over Barry et al., US Patent Number 7,225,249, and in view of Broadhurst, US Patent Number 6,560,634.

While applicant does not acquiesce to the new rejections, in order to facilitate advancement of the application, and without prejudice or disclaimer, applicant has amended the independent claims to recite “wherein said second data request is automatically generated based on said first data request to select said at least one second result having content associated with, but not identified by, said first data request.”

Neither Barry et al. nor Broadhurst teach or suggest any such method, device or computer readable medium in which a second data request is automatically generated based on a first data request to select at least one second result having content associated with, but not identified by, the first data request. Therefore, claims 1-18 are believed to distinguish the references at least on that basis.

New dependent claims 19, 20 and 22 provide that “said first data request comprises a content data string and said second data request is generated based on said content data string to select said at least one second result having content associated with, but not identified by, said content data string.” Neither Barry nor Broadhurst is believed to teach or suggest the automatic generation of a second data request based on a content

data string within a first data request, to select at least one second result having content associated with, but not identified by, said content data string.

It is therefore respectfully submitted that the application is now allowable.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Steven M. Hoffberg". The signature is fluid and cursive, with the first name "Steven" and last name "Hoffberg" being more legible than the middle initial "M".
